About Me

AI Engineer with 3+ years building production LLM applications and full-stack systems. Hands-on with Retrieval-Augmented Generation (RAG), agentic workflows (LangGraph), and vector search, shipped alongside strong Next.js/MERN engineering. Focused on turning LLM prototypes into reliable, scalable products.

AI Projects

QuizzyAI — Adaptive Quiz Agent — FastAPI, LangGraph, LangChain, FAISS, Groq, Next.js

Built an agentic RAG pipeline that chunks and embeds PDFs into a FAISS vector store; a LangGraph agent evaluates answers, dynamically adjusts difficulty, and generates explanations via Llama. Indexed 100+ page PDF documents with under 2s average query latency.

AI Portfolio Assistant (RAG) — Next.js, LangChain, Ollama, TypeScript

Built a self-hosted RAG assistant answering questions about my experience in real time, using semantic search over embedded documents and token-level streaming responses for sub-1s time-to-first-token.

Professional Experience

Independent — Freelance Development & AI Engineering Upskilling, Tunisia

Sep 2025 – Present

Freelanced on client projects spanning full-stack development to AI/LLM integration, alongside intensive self-directed AI Engineering training (LLMs, RAG, agentic workflows) applied directly in QuizzyAI and AI Portfolio Assistant. Also designed, produced, and sold 3D-modeled products independently, managing e-commerce operations and social media marketing.

Software Engineer, OLINDIAS, Tunisia (2+ years)

Aug 2023 – Sep 2025

Developed and shipped 10+ scalable web/mobile features (Next.js, MERN, MEAN, Flutter, Kotlin) for SaaS products serving 1,000+ users; optimized backend APIs, cutting average response time by 20%.

Software Engineer Intern, OLINDIAS, Tunisia (6 months)

Dec 2022 – Jun 2023

Built web and mobile interfaces (ReactJS, Flutter) and developed RESTful APIs using Node.js, supporting 500+ concurrent users.

Front-end Software Engineer Intern, OLINDIAS, Tunisia (2 months)

Jul 2022 – Sep 2022

Integrated Figma designs into ReactJS and customized WordPress themes for dynamic content.

Other Projects

FabrionLab - E-commerce Platform — Next.js, MongoDB, Zustand, Tailwind CSS

Full-stack e-commerce platform with dashboard and order management.

Jocker Shop — Next.js, Prisma

E-commerce platform with authentication and product customization features.

Technical Skills

- **AI/ML:** LLMs, RAG, Agentic Workflows (LangGraph), LangChain, Ollama, HuggingFace, Prompt Engineering, Vector Search (FAISS), n8n
- **Languages:** Python, JavaScript, TypeScript, Java
- **Frontend:** React, Next.js, Tailwind CSS, Zustand, Redux
- **Backend:** Node.js, Express, FastAPI, Spring Boot, .NET
- **Mobile:** Flutter, Kotlin
- **Databases:** MongoDB, PostgreSQL, MySQL
- **DevOps/Tools:** Docker, Git, CI/CD, Cypress

Education

Engineering Degree in Software Development

Sep 2020 – Jul 2023

The Private Higher School of Engineering and Technology (ESPRIT), Tunisia

Bachelor of Science in Computer Engineering

Sep 2017 – Apr 2020

The Higher School of Informatics and Mathematics (ISIMM), Tunisia

Certifications

AI Engineering Bootcamp — Udemy (2026) | Flutter Development — Udemy (2023) | Full-Stack Web Development — Udemy (2022)

Languages

Arabic (Native) | French (B2) | English (B2) | German (A1)
